Select Category:

Product ID	Product Name	Product Category	Product Brand	Price	Discount	Price Rating	Rating

The following figure shows the User interface for the system. The System allows users to add accessories to the system, to search accessories by Price they cost, to search accessories based upon the categories they belong to, to delete the existing accessories.

The detailed guide to how to conduct the following process is given below:

### To add any accessory to the system:

Enter the product id

Enter the Product Name

Enter the product Category

Enter the Product Brand

Enter the Discount

Select the price Rating as Low or High

Select the Rating by sliding the slider

### **To search accessories by the Price**

Enter the price by which the accessory is to be searched

Press the search by price button

If an accessory having the price entered in the field exists the result is shown by a pop up.

### **To search accessories by the Category**

Select the category from the drop-down box having "Select Category" written in it and select one of the categories.

Press the search by category button and the list of accessories will be shown in a popup.

### **To delete data from the inventory**

Press the File button from the Menu item

Press Open project from the drop-down menu

Then the items in the inventory will be listed

After the listing of items on the table press the delete button on the bottom of the GUI

The last item on the list listed on the table will be deleted.

### **To exit the GUI**

For exiting the GUI press the File menu on the top left

Select EXIT from the drop-down menu.

The GUI will be exited.
